

The NC Aerospace Initiative connects a variety of enterprises in the aerospace sector that are working to promote the industry's growth. The NCAI is a coalition of aerospace interests that have come together to align these enterprises and to act as a clearinghouse for all things aerospace. This resource guide is a product of the NCAI initiative.

## North Carolina Community College System Customized Training Program

The greatest asset that North Carolina Community Colleges have is flexibility. In a rapidly changing global economy in which innovation means the difference between business success and failure, the skills industries require of their employees evolve more rapidly than ever before. In North Carolina, our world-renowned Customized Training Program will create success for your company and your employees by quickly responding to industry's changing skills needs.

Customized training programs can provide flexible scheduling for many topics, including:

- Lean Manufacturing
- Six Sigma
- Project management
- Statistical process control
- Hydraulics
- Pneumatics
- Electronics
- Preventive maintenance
- Troubleshooting

The overall scope of services includes:

- Single courses or a customized series of courses
- Courses that vary in length according to the complexity of skills and your needs as an employer
- On-site or off-site training
- Technical training such as welding, electrical, hydraulics, and pneumatics
- Professional development training for supervisors and managers
- Computer training ranging from basic to advanced applications
- Certification/licensing programs
